

# MACRA/MIPS Update

- How to report MIPS in 2017 – (MIPS APM – ACO)
  - Improvement Activities – 20% full credit for ACOS
    - (care coordination, expanded hours, behavioral health, etc)
  - Advancing Care Information – 30% weighted average of MIPS eligible clinicians for all of the ACO TINS
    - (physicians, PAs, NPs, CNSs, CRNAs (<75% hospital based))
  - Quality – 50% MSSP CMS GPRO Web Interface Measures
  - Cost – N/A Not included in future ACO MIPS scoring
- Full credit for Cost and IA, as well as relief from reporting, offsets risk of potentially better individual and ACI scores

# ACI Reporting

- Ends and replaces Medicare Meaningful Use - measures are similar based on MU level (Stage 3 or Modified Stage 2)
- Each TIN continues to submit directly to CMS
- Capped at 100 points total
- All base score measures must be reported to earn any points at all (reporting a yes/no for 4-5 measures (security risk analysis, ePrescribing, Patient Access, HIE, Summary of Care)

# ACI Reporting, cont'd

- Score is weighted average of MIPS eligible clinicians for all of the ACO TINs – for Track 1 ACOs, APPs and non certified EHR providers can be excluded from ACI – however, if they are reported, they are scored
- 90 consecutive days of tracking are required (we will track going forward and select best 90 consecutive)
- In 2018, all CEHRTS must be 2015 edition
- In 2019, a full year of ACI data will need to be submitted

# Security Risk Assessment

- Each eligible provider in the TIN needs a security risk assessment
  - Policies and procedures
  - Data sharing
  - Can't leave computer screen on with PHI, etc
- Each eligible provider must have a written statement before or within the 90 day window that you are following this.

# MIPS Scoring Impact on Provider Reimbursement

- Not reporting anything = 0 points; (4%) payment reduction in 2019
- Reporting something gives individual or group a score of at least 3, which avoids payment adjustment (neutral)
- Any score above 3 – 70 could mean a 0% to 4% upward adjustment
  - “revenue neutral” in that low performers will subsidize the high performers
  - Special pool for exceptional performers
    - Bonus of .5% – 10%
- WMPN *estimated* score 64 out of 100 per Premier

# MIPS Next Steps

- Quality – continue as usual, along with education on measures – Dr. Riley
- Advancing Care Information (MU) – Jill Mazzeo
  - Letter and survey to each practice
  - Education for Provider and/or Office Manager
  - Each TIN to provide monthly reports for each of the fourteen measures to ACO
  - 90 day submission period to be determined
