Our Philosophy: Provide high quality, cost effective rehabilitation, to help our clients achieve the highest possible level of function.

Our Mission: Our WMHS CIRU inpatient program is dedicated to providing comprehensive rehabilitative services for our patients with physical, functional thinking, swallowing and/or communication impairments. Through a team approach, we focus on providing sound rehabilitative therapy to affect positive change in functional ability, independence, and self-reliance across a variety of environments, while protecting and promoting the rights of the persons served.

Our team is committed to helping improve your best level of physical, educational, and psychosocial skills necessary for your return to your prior level of functioning.

- **Daily Services Provided:**
  - At least two types of therapies (physical, occupational, speech/language therapy) for an average of 3 hours per day, or 15 hours per week.

- **Additional services provided were:**
  - Rehabilitative nursing
  - Medical care
  - Nutritional consultation
  - Prosthetic and orthotic consult
  - Neuropsychology
  - Fall reduction program
  - Pastoral Care
  - Pet Therapy

Patients admitted to the CIRU have a significant disability that restricts their ability to function independently. The causes of impairment for the patients this year were:

- Stroke
- Orthopedic
- Medically Complex
- Spinal Cord
- Brain Injury
- Multiple Trauma
- Debility
- Cardiac
- Neuro
- Arthritis
- Pulmonary
- Amputee
321 Patients Served

Average number of days in CIRU:

10

53% Women
47% Men

Average Patient Age

75

Where our patients went after discharge:

- Returned to their home: 79%
- Admitted to or returned to long-term care: 14%
- Unplanned return to acute care facility: 6%

The program has been expanded to promote a well rounded focus on health and wellness for patients after they leave the rehabilitation program.
